Build it Forward

caring enough to make a difference

As part of our commitment to changing the world, we have developed the "Building it Forward" programme where we strive to make a positive impact on local communities.

There are many different reasons why one should get involved in giving back to the community. The "Building It Forward" programme allows individuals and groups to do just that.

A project will be identified in which a certain organisation e.g a frail care home or a rural crèche, may require building to be done.

This may be building a wheel chair ramp, a play ground, an outbuilding or even a classroom.

All the necessary building equipment, tools, and hardware will be purchased and taken to site before the arrival of the delegates.

Delegates will be given a briefing and will be commissioned with specific tasks and a time frame in which those tasks need to be completed.

Involvement in projects of this nature develop leaders and create strong confident teams.

Learning to give: an action of the heart... a project of the mind.
