Bush Navigation

Navigate

find your way

Delegates board open game drive vehicles complete with GPS, digital camera, map, wildlife reference books and crossword puzzle. Under the watchful eye of the ranger / guide teams navigate their way through the bush to a series of waypoints which correspond to the “across” and “down” questions of the crossword.

Accurate usage of the GPS (Global Positioning System) is imperative in ones quest to complete this exercise which is wildlife orientated in every respect.

Whilst not a race, the competitive element kicks in and the tendency is to speed which is strictly forbidden in the Park and is checked against the GPS.
