## Dolphin Encounters

Gentle  
magnificent connections

Experience, enlighten and evolve as you come face to face with these magnificent creatures. Dolphins are not only beautiful and fun to watch, but their playful curiosity can sometimes get them into trouble.

A close encounter will not only enrich and change your life but will create awareness resulting in the conservation of this species of mammal. They remain wild animals though, so by working together we can insure that the coastal bottlenosed dolphins will be here to delight us for generations to come.
