Game Rangers

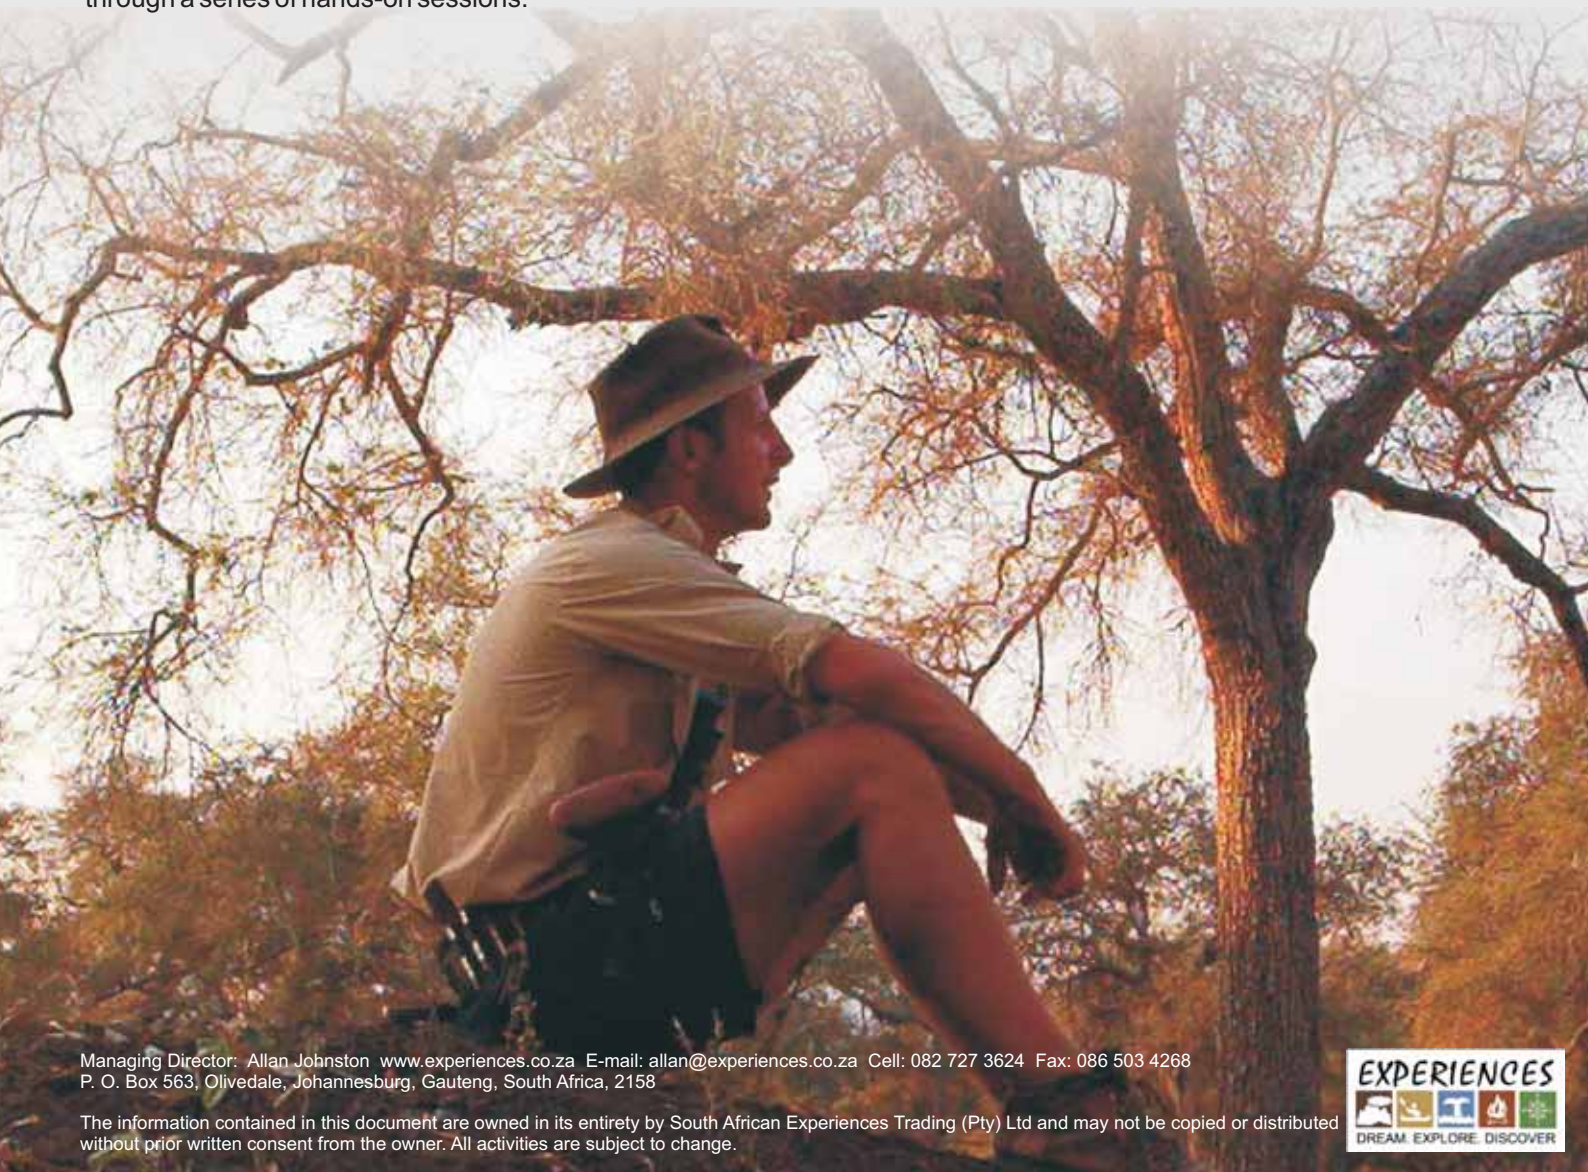

Passion

a day in the life of a game ranger

This highly engaging and interactive programme is designed to offer an insight into the secrets of the African bush in an extraordinary manner which provides simple and logical solutions to basic survival.

Components of this exciting programme include survival rules, traditional fire making, bush cooking, water collection and indicators, bush medicines and repellents, snake identification and handling, navigation through nature, tracking as well as other interesting topics.

This is not a competitive event but rather an educative exercise. The group is therefore split into smaller units that rotate through a series of hands-on sessions.
