Strategy

Initiative

experience initiative

Strategy is a plan, method, or series of maneuvers or stratagems for obtaining a specific goal or result. In this module delegates are divided into teams and handed an envelope containing a set of instructions/ tasks referring to an "assignment" which they will need to use their initiative to be able to solve in the allotted time period. Approximately 3 hours are allocated to fulfil the assignment.

Example: Teams are requested to work out the total flying time between 3 given destinations, departing Johannesburg. Teams are also required to obtain the cheapest, official quote, in writing to fulfil the task.

This programme will test their ability to "think outside of the box". How they fulfil the task, is entirely up to them.
